

Friday, 17th October 2025

Dear Families/Carers,

We are excited to share our new Home Learning Plan (HLP) with you. They have been designed to complement and reinforce your child's personalised curriculum.

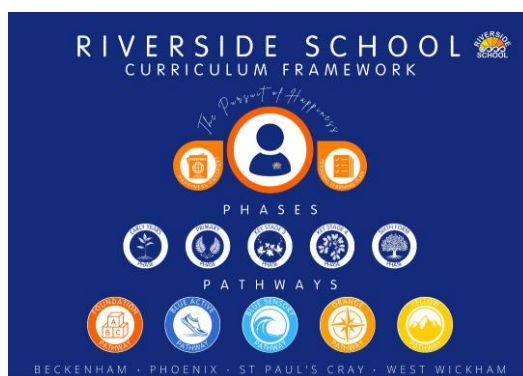

The HLP offers suggested activities to support your child's learning at home, drawing upon the key subjects and topics that we are currently exploring in class. The HLP has been personalised to reflect the current priorities within your child's Phase and Pathway. The HLPs have been created and adapted by your child's class teacher to provide a meaningful document to support at home. The new format intends to provide more information on the work and themes that your child is currently exploring at school and some ideas of how you could reflect these at home if you would like to do so.

We understand that home life can be busy, with many competing demands and, as such, we want you to know that these activities are entirely optional. We encourage you to use the HLP as a resource to enhance your child's learning, but there is no pressure or expectation from us for you to complete the suggested activities.

If you would like any additional support, or would like any further home learning suggestions, please don't hesitate to contact your child's class teacher. We are here to help you to support your child's learning at home in any way that we can.

Please let your child's class teacher know if you have any questions regarding anything within this document.

Thank you for your continued support.

Yours sincerely

Charlotte Downs
Deputy Headteacher
